George —

Per our telecon yesterday, attached is the draft of Chap. IV B which you kindly agreed to review. I would greatly appreciate your opinions on those portions dealing to machine development (including Intellofax).

As indicated by the "Tentative General Outline," this particular section is rather broad-brush. Developmental details (in part) are supposed to be covered by [redacted] when she writes IV C-1-2-3. She has already read the attached and agrees with the contents. 25X1A

I sincerely appreciate your willingness to review this. I naturally depend upon people like you to assure authenticity. I also plan to have John [redacted] review it. Any other suggestions? 25X1A

Sincere thanks.

Bill
